

**AMENDMENTS TO THE SPECIFICATION:**

Please insert the following at page 1, before line 1 and after the title:

**BACKGROUND**

1. Technical Field

Please insert the following at page 1, between lines 6 and 7 as follows:

2. Related Art

Please insert the following at page 2, before line 1:

**BRIEF SUMMARY**

Please insert the following at page 2, at line 20:

**BRIEF DESCRIPTION OF THE DRAWINGS**

Please insert the following at page 2, at line 31:

**DETAILED DESCRIPTION OF EXEMPLARY EMBODIMENTS**

Please amend the paragraph at page 7, beginning at line 10 as follows:

As described above, the timing of the downloading of the e-mail data can be triggered by new e-mail arriving at the server 103 or by a predetermined time having elapsed. In addition or alternatively, the downloading could be triggered when activity on the D-channel is within a predetermined range such as at a minimum such as during the night. In addition to e-mail being downloaded it would also be possible to download other data (including instruction data) such as previously ordered software, the results of searches, news information or telemetry data. As well as being used to download data from the server to the client computer, the arrangement described

above can also be useful for sending data from the client computer to the server computer such as e-mails for sending. With such an arrangement it would then be possible to send and receive non-urgent data without needing to make a specific call to the appropriate e-mail/internet service provider. This would reduce the use of valuable B-channel bandwidth and increase the convenience to the user.

Please amend the title at page 9, before claim 1 as follows:

~~CLAIMS~~ WHAT IS CLAIMED IS:
